

CMS HAC Expansion (2028): Significant Increase in Reportable Pressure Injuries

[CMS 2028 Update](#)

Effective January 2028

- Stage 2 + Deep Tissue Injuries added as reportable events
- Reportable PIs **increase from 21.5% to 83.2%** of all HAPIs
- Stage 2 and DTI represent the largest portion of pressure injuries in acute care
- Hospitals will now be accountable for the majority of pressure injuries

[PI Stage Distribution](#)

This represents a **287%** increase in reportable events tied to HAPIs.
